

# BuffBurgers

Cameron Taylor, Steven Jace Conflenti, Callie Jones, Alex Luo, Alex Walling

Project Tracker: <https://trello.com/b/p70XVe6b>

**Deployment:** In a real deployment we would upload the iOS app to the App Store, but we've decided not to publish it. The website is deployed at <http://cubuffburgers.herokuapp.com/>.

**Auto-doc:** We used the npm package 'autodoc' to auto-document some of our Javascript code. Because almost all of our project was iOS/Swift and a little bit of HTML, there weren't many files we could run an auto-documenter on. The autodoc code can be found at <https://github.com/cata5492/BufBurgers/tree/master/autodoc>.

VCS: <https://github.com/cata5492/BufBurgers>

\* Callie had a huge merging issue when trying to update the iOS code, so her contributions from April 3 - 17 are not representative of the actual work involved.

Feb 7, 2016 – Apr 26, 2016
